Hydraulic Brush Cutter for 75-100 Class Mini-Excavators

Our 48" **Tiger Shark** is the perfect match for your 75-100 Class mid-size Excavator. It's made of 1/4" steel plate and is reinforced with AR400 Skid plates and Rake edges. The Cutters "Shark Teeth" are also reinforced with AR400 plate. Hot Dip Galvanize and commercial grade **Gear-Tek** hydraulic motors coupled to our BH300 (in house made) Load Bearing assures long life in the field! This 3 Bladed Cutter targets 20,000 feet per minute of tip speed. This is 5000 FPM faster than other rotary Cutters on the market. The Tiger Shark, one of the meanest Predators on the Reef will make short work of grass, brush and small trees up to 7-8".
