Black Tip #BT36

Hydraulic Brush Cutter for 30-40 Class Mini-Excavators

Our 36" **Blacktip cutter** is a lighter weight cutter weighing in at only 610 Lbs. It is made of 3/16" steel and has two blades. This cutter was designed for excavators as small as 30 Class mini's. We use the same style industrial grade, Gear-Tek motors as our larger cutters. Skid plates and rake edges are solid AR400 steel for long life.

Grass, brush and small trees up to 4-5" are no match for this ferocious predator!
